In 1H2016, FPT recorded consolidated revenue of VND 17,818 billion, equal to 94.7% of the YTD target. Profit before tax was VND 1,258 billion, equal to 100.1% of the YTD target. PAT attributed to parent company’s shareholders was VND 862 billion in 1H2016, achieving 102.0% of the YTD target. YTD earnings was lower than prior year period, yet being on par with the YTD target due to foreseeable factors will are specified in segment reporting section below.

Overseas markets continued to grow healthily. In 1H2016, revenue from overseas markets was VND 2,713 billion, up 34% YoY. Profit before tax from overseas markets was VND 377 billion in the same period, up 31% YoY.

Table 2 - Financial performance by segments in 1H2016

Note: Subtotals may not add up due to rounding error.
TELECOM SECTOR

The Technology sector recorded revenue of VND 3,944 billion, up 14% YoY, achieving 98% of the YTD target. Profit before tax (PBT) was VND 358 billion, down 9% YoY and equal to 79% of the YTD target due to the slow performance of domestic project-based segments in the first six months, while the software outsourcing segment continued to grow healthily.

Software development

Software development comprises of software outsourcing sub-segment, which mostly serves customers in developed markets including Japan, the US, Europe and Asia Pacific (APAC), and software solutions sub-segment, most of the revenue of which is derived from the domestic market with increased contribution from developing markets such as Laos, Cambodia, Myanmar, and especially South Asian countries including Bangladesh.

Overseas markets have played a key role in delivering growth for the software development in the first six months, while domestic market was weak. In 1H2016, software development’s revenue was VND 2,671 billion, up 30% YoY in which software outsourcing’s revenue was VND 2,359 billion, up 37% YoY. Earnings of the software outsourcing business also grew well, which was up 27% YoY, to VND 349 billion. However, profit margin was lower than prior year period as there was a higher percentage of people working on-site versus last year, which is seen as a necessary step to enter bigger contracts going forward.

On top of that, software solution’s revenue was VND 311 billion, down 7% YoY and equal to 82% of the YTD target as less projects came to completion phase as compared to prior year period. Lower revenue has led the software solution sub-segment to record a loss of VND 38 billion in 1H2016.

System integration and IT services

The (hardware) system integration segment recorded VND 889 billion in 1H2016, down 10% versus the prior year period. The segment recorded PBT of VND 14 billion (versus a loss before tax of VND 2 billion in 5M2016). Similarly to software solutions segment, lower revenue being recorded in 1H2015 has caused a lower profit for the system integration segment.

The IT services segment recorded revenue of VND 384 billion, down 7% YoY, while PBT was VND 32 billion, down 42% YoY and reached 79% of the YTD guidance.

Total value of contract signed in 1H2016 was VND 2,014 billion, down 4% as compared to prior year period and mainly comprises of software solutions, IT services and overseas contracts, of which the delivery time is longer than hardware (system integration) contracts, of which the delivery time is shorter and revenue can be booked normally within a year. Backlog balance for the three segments including system integration, software solutions and IT services ended up being VND 2,997 billion by the end of June.

TELECOM SECTOR

The Telecom sector reported 1H2016 revenue of VND 3,178 billion, up 26% YoY, and profit before tax of VND 533 billion, down 1.9% YoY. Revenue and PBT of the Telecom sector exceeded the YTD target by 2% and 13%, respectively.

Telecom services

Telecom services segment recorded VND 2,960 billion in revenue, growing by 26% YoY, equal to 102% of the YTD target. PBT was VND 422 billion in the first six months, down 11% YoY. YTD earnings achieved 110% of the YTD target. As mentioned in our previous monthly newsletters, the negative YTD earnings growth was reflected in the YTD plan due to the cost allocation of the fiber optic swap projects in both Hanoi/HCMC and the Tier-2 cities. In 2015, FPT completed the fiber optic swap project in Hanoi and Ho Chi Minh City (HCMC) in June 2015 and allocated the costs relating to last-mile cable and modem in 12 months accordingly. Besides, starting from September 2015, FPT implemented the fiber optic swap project in Tier-2
cities, of which the total number of accounts to be swapped is expected to be around one-third of that in Hanoi and HCMC, hence a lower cost. However, as we look at only earnings in 1H2016, costs being allocated to COGS include both costs relating to the project in Hanoi and HCMC (which will finish its allocation period in June 2016), and the on-going project in the Tier-2 cities, therefore, are higher than 1H2015. Costs from July onwards are expected to be lower thanks to lower costs of implementing the project in Tier-2 cities versus the two major cities Hanoi and HCMC due to smaller scale, and that the cost allocation for the project in Hanoi and HCMC will also end in July.

In more details, revenue from providing broadband services to individuals and households recorded a healthy growth of 19% YoY, achieving VND 2,058 billion in 1H2016. Other non-broadband telecom services, including leased line, voice, data center and IPTV services have also performed well and recorded 44% top-line growth on a year-over-year basis, to VND 902 billion in the same period.

Digital content
Revenue of digital content segment (include only online advertising from 2016) was VND 217 billion, up impressively by 33% YoY, and PBT of VND 110 billion in 1H2016, increasing by 59% YoY and exceeded the YTD target by 30%. Excluding the irregular financial gain from selling stake owned by FPT Online in a member company to a strategic investor, as explained in our previous monthly newsletters, the YTD earnings also delivered an impressive 44% YoY growth.

DISTRIBUTION AND RETAIL SECTOR
Revenue from distribution and retail sector was VND 10,349 billion in 1H2016, down 20% YoY, and profit before tax of VND 280 billion, down 24% YoY (5M2016: down 27% YoY).

Distribution of IT products and mobile handsets
The distribution business recorded revenue of VND 5,613 billion, achieving 82% of the YTD target, and PBT of VND 182 billion, achieving 86% of the YTD target. Earnings growth was less negative as compared to that in 5M2016 showing some improvements.

It should be noted that the distribution segment had delivered double digit growth in the first eight months last year thanks to the strong performance of the iPhones. Performance of the distribution business this year has been negatively affected mostly in accordance with the change in iPhone distribution policy by Apple. Besides, performance of FPT Trading’s smartphone distribution was also weak due to the poor sales performance of Lumia models globally. IT products, on the contrary, was performing well and exceeded target in terms of earnings. From July 24, FPT Trading will distribute Xiaomi Mi4 smartphone in Vietnam (click for more details).

Retail business
Technology product retail business, on a contrary has maintained impressive growth. Ending the first six months, retail revenue was VND 4,736 billion, up 32% YoY, and profit before tax was VND 98 billion, up 38% YoY. Both revenue and profits were slightly higher than the YTD target. FPT Retail has completed its initial full year store roll-out plan right in the first six months, ending having 318 stores by the end of June. Online sales continued to prove as a revenue accelerator by delivering 48% YoY growth in the first six months, accounting for 10.1% of retail sales during the same period, versus plan of 7.2%.

EDUCATION SEGMENT
The Education segment has returned to the double digit growth track thanks to higher number of students enrolled in 2015. Ending the first six months, the education segment recorded revenue of VND 298 billion, up 14% YoY, equal to 100% of YTD target.
SUMMARY OF NOTABLE EVENTS IN 1H2016

EARNING PRETIGIOUS AWARDS
